

M-C

MAINTENANCE PERFORMANCE REVIEW TOOL PRODUCT DESCRIPTION

M-C is a powerful maintenance management Review and Improve tool, developed for the Technical and Operational Excellence department of a multi-national Oil and Gas company, based on their current internal maintenance optimisation toolbox .

Enabling first stage high-level Review and Improve of maintenance strategy planning and implementation, M-C shows the "situation now" and indicates to maintenance management teams the economics of their current maintenance exertion. The outputs of the process indicate areas in which gains may be made from strategy alignment and optimisation.

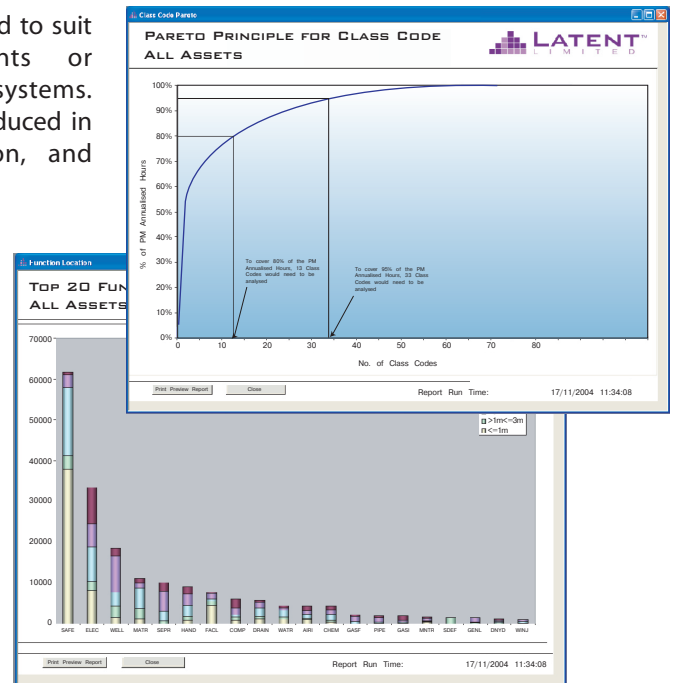

TOOL KEY FEATURES

- Reviews Maintenance Strategy Performance
- Extensive Reports Using The Pareto Principle
- Easy To Navigate User Environment
- Proven Process Around The World
- Can Align KPIs For Different Regions/Areas Of Operation
- View Graphs Can Be Exported To Other Applications

M-C has been developed so it can be tailored to suit any individual company requirements or maintenance management database systems. Currently analysis and reporting can be produced in five areas, such as equipment location, and equipment class code.

BENEFITS OF M-C

- Provides An Auditable Trail To the Business Case.
- Outputs Are Suitable For Use In Scorecard Setting
- Provides Realistic Generic Measurement Options
- Allows Integrity Management
- Highlights Potential Deferment Areas
- Enables Maintenance Cost Optimisation
- Can Lead to Increased Equipment Availability through Optimising Maintenance Plans

WHO COULD BENEFIT FROM THIS TOOL?

M-C is appropriate for use in organisations with a large portfolio of maintenance activities. It is suitable for use at any point in an Asset life cycle and can play a vital role in the first stage of a maintenance measurement and performance optimisation process.
